

Press Release

From: Michael C. Hritz, Director of Community Development
Date: March 18, 2014
Re: NORTH BRUNSWICK ANNOUNCES 2014 ROAD PROGRAM

The Township of North Brunswick's 2014 Road Program will launch next month and includes nearly \$3.6 million in street and utility improvements to seven Municipal roadways, according to Director of Community Development Michael Hritz. The schedule, which is weather dependent, includes a series of improvements from now through the fall.

Thatchwood Court will be entirely reconstructed including storm system improvements. The portion of Hoover Drive from Schweitzer Place to the PSE&G Right-of-Way will also be completely reconstructed, along with a much needed water system replacement.

Other complete reconstructions will take place on Barrymore and Beecher Places. On Revere and Otis Roads there will be base repairs, mill and overlays, and water system upgrades.

Reconstruction of Redmond Street, which will include water system upgrades and a sidewalk to connect with the John Adams School, will also commence this summer immediately after school ends for the year. That project is funded in part with a grant from the New Jersey Department of Transportation Municipal Aid Program in the amount of \$340,000.

Mayor Womack and the Township Council have been steadfastly budgeting an average of \$3 million per year to maintain and improve the municipal road and utility system. Since 2001, the township has spent more than \$30 million repairing more than 104 Municipal roads and the associated utility infrastructure covering more than 28 miles.
